

Permit-to- Dig

1	Before digging any excavations, it is important to plan against the following: collapse of the sides, materials falling onto people working in the excavation, people and vehicles falling into the excavation, people being struck by plant, undermining nearby structures, contact with underground services, access to the excavation, flooding, fumes, accidents to members of the public	5	Make sure that the person supervising excavation work has service plans and knows how to use them.	10	Trained banksman should be used when operating or reversing near excavations, they should be clearly identified and have a clear line of sight with the operator.
		6	A safe means of access and egress should be provided, prevent the sides and the ends from collapsing by battering them to a safe angle or supporting them with timber, sheeting or proprietary support systems.	11	Look around for obvious signs of underground services, e.g. valve covers or patching of the road surface. Use locators to trace any services. Mark the ground accordingly.
2	A competent person must inspect excavations with the results recorded. - At the start of each shift before work begins - After any event likely to have effected the strength or stability of the excavation and - After any accidental fall of rock, earth or other material.	7	Suitable barriers, edge protection, signage, toe boards and signs should be placed around excavations.	12	Never enter into an unsupported trench or work ahead of the supports. If in doubt do not enter the excavation, immediately report the fault to the site supervisor.
3	Make sure the necessary equipment needed such as safety barriers, trench sheets, props, baulks, etc, is available on site before work starts	8	The excavation must be clearly identifiable at night.	13	Do not store spoil or other materials close to the sides of excavations. The spoil may fall into the excavation and the extra loading will make the sides more prone to collapse.
4	Wear a hard hat when working in excavations.	9	A competent person must supervise the installation, alteration or removal of excavation support.	14	Where children might gain access onto the site out of hours, precautions must be taken i.e. backfilling or securely covering to reduce the chance of them being injured.

* These are recommended controls and do not provide an exhaustive list

Permit valid from:-

Day & Date:		From:		am	pm	To:		am	pm
Work location & Description:									
Specific Safety Control Measures required	(Attach separate sheet / <u>method statement</u> as required)								

Authorisation:-

This Permit is valid for the above stated times and is issued to:-

Name of Company:-		Name of Company Supervisor in Charge of Works :- HB person issuing Permit:	
Signed (HB person issuing Permit)		Date:-	Time:-

Acceptance:- (Supervisor in charge of excavation works)

Name of Company:-		Name of person accepting Permit:-	
I hereby declare that I accept responsibility for carrying out the work detailed and that no attempt will be made by me, nor by any person under my control, to carry out work which does not follow the procedures set out above. I have checked that the control measures as specified above are satisfactory			
Signed (Supervisor in Charge of Excavation Works)		Date:-	Time:-

Acceptance:- (Machine Controller)

Name of Company:-		Name of Machine Controller:-	
I hereby declare that I have been advised of the content of the RAMS connected to this Permit to Dig. I further confirm that I understand their content and will comply with them as well as adhere to industry best practice given at the mobile plant training I have received			
Signed (Machine Controller)		Date:-	Time:-

Acceptance:- (Excavation Banksman)					
Name of Company:-		Name of Excavation Banksman:-			
I hereby declare that I have been advised of the content of the RAMS connected to this Permit to Dig. I further confirm that I understand their content and will comply with them as well as adhere to industry best practice given at the training I have received					
Signed (Excavation Banksman)		Date:-		Time:-	
Cancellation:-					
I hereby certify that the work has been stopped temporarily and that all personnel under my control have been withdrawn and warned that it is no longer permitted to carry out further work unless a new permit is issued					
Signed (Supervisor in Charge of Works)		Date:-		Time:-	
Clearance:-					
I hereby declare that the work has been successfully completed					
Signed (Supervisor in Charge of Works)		Date:-		Time:-	
Verification:-					
I hereby declare that the work has been completed, that safety measures have been removed and it is safe to resume normal operation of works					
Signed (HB person issuing Permit)		Date:-		Time:-
